Cellophane Lamination

High-quality, Non-slip, & Protective

Cellophane lamination—also known as film lamination—is a finishing technique in which an ultra-thin film is applied to the surface of printed materials. It protects against scratches, moisture, and wear and tear, and gives the product a high-quality appearance. Depending on the type of film (matte or glossy), different visual and tactile effects are created.

We laminate *food & beverage menus, business cards, flyers, brochures, postcards, covers for softcover books*, and much more.

Poster Printing

We'll put it on the wall

We print your posters exactly as you envision them, in standard sizes up to A0, or in any custom size up to 1.10 meters wide and 15 meters long.

110 cm is the maximum roll width we can offer on 120 g/m² paper.

For 135 gsm outdoor posters, certain colors (e.g., deep black) may appear slightly paler due to the special material properties of the printing medium.
